International Journal of
QUANTUM CHEMISTRY

Contents for Volumes 41, 1992, Nos. 1–6 and 42, 1992, Nos. 1–6

Issue No. 1, January 5, 1992

Issue in honor of F. A. Matsen

Editorial
P.-O. Löwdin 1

F. A. Matsen 3

Introduction 5

Scientific Reminiscences
F. A. Matsen 7

Algebrants in Many-Electron Quantum Mechanics: Applications of Generalized Determinants or Matrix Functions
R. D. Poshusta and D. B. Kinghorn 15

Symmetric-Group Algebraic Variational Solutions for Heisenberg Models at Finite Temperature
D. J. Klein and W. A. Seitz 43

The Berry Phase in Molecular Physics
A. Bohm, B. Kendrick, and M. E. Loewe 53

Algebraic Methods in Molecular Structure
F. Iachello 77

Graphical Unitary Group Approach to Spin–Spin Interaction
R. D. Kent, M. Schlesinger, and I. Shavitt 89

Eigenvector and Eigenvalues of Some Special Graphs. IV. Multilevel Circulants
S.-L. Lee, Y.-L. Luo, B. E. Sagan, and Y.-N. Yeh 105

Valence Bond Approach Exploiting Clifford Algebra Realization of Rumer–Weyl Basis
X. Li and J. Paldus 117

International Journal of

S.-L. Lee, Y.-L. Luo, B. E. Sagan, and Y.-N. Yeh 105

Valence Bond Approach Exploiting Clifford Algebra Realization of Rumer–Weyl Basis
X. Li and J. Paldus 117

Eigenvalues of Single-Cycle Class-Sums in the Symmetric Group
R. Pauncz and J. Katriel 147

On the Internally Contracted Multireference CI Method with Full Contraction
P. E. M. Siegbahn and M. Svensson 153

The Measure Cone: Irreversibility as a Geometrical Phenomenon
P. Busch and E. Ruch 163

Freeon Tensor Product States and the Unitary Group Formulation of the Many-Electron Problem
L. L. Campbell 187

On Rotations as Special Cases of Unitary Transformations with Some Applications to the Theory of Spin
P.-O. Löwdin 213

Issue No. 2, January 20, 1992

Application of the Green's Function Theory to the Calculation of Ionization Potentials of Model Oligomeric Systems
M. Deleuze, J. Delhalle, and J.-M. André 243

Ab Initio Calculations of All-*Trans* Octatetraene and Eight Isoelectronic Conjugated Chains: Semiempirical Heats of Formation and Stabilization Energies
E. Younang, J.-M. André, and J. Delhalle 257

Finite-Size Dimensional Analysis of the Superconducting Vibronic Interaction
A. Tachibana 273

Ab Initio Calculations of Many-Body Energy Expansion in $Li_n^+F^-$ Clusters
A. S. Shalabi, M. A. Kamel, and Kh. M. Eid 281

Theoretical Calculation of Electrode Potentials: Electron-Withdrawing Compounds
S. G. Lister, C. A. Reynolds, and W. G. Richards 293

(continued)

Vector Coupling Coefficients for Calculations of Transition-Metal Atoms and Ions by the SCF Coupling Operator Method
B. N. Plakhutin, G. M. Zhidomirov, and A. V. Arbuznikov 311

On the Quality of Basis Sets
T. L. Sordo and J. A. Sordo 327

Evaluation of Two Center, Two- and Three-Electron Integrals Involving Correlation Factors over Slater-Type Orbitals. I. Basic Integrals
J. Budziński 339

Evaluation of Two Center, Two- and Three-Electron Integrals Involving Correlation Factors over Slater-Type Orbitals. II. Kinetic and Potential Energy Integrals and Examples of Numerical Results
J. Budziński, M. Firszt, and W. Woźnicki 359

Quantum Chemical Calculation of the Barrier for Tunneling of Hydrogen in Hydrogen Abstraction from Methane by Methyl
A. K. Chandra, E. J. Padma Malar, and D. Sen Gupta 371

Errata

Ewald Summation Retards Translational Motion in Molecular Dynamics Simulation of Water
O. Teleman and A. Wallqvist 381

A Molecular Dynamics Study of Ejection of Molecules from a Vibrationally Excited "Track" in an Amorphous Solid
S. Banerjee and R. E. Johnson 383

Announcement 385

Issue No. 3, February 5, 1992

The Fix–Heiberger Procedure for Solving the Generalized Ill-Conditioned Symmetric Eigenvalue Problem
M. Jungen and K. Kaufmann 387

Improved Quadrature Methods for the Fourier Transform of a Two-Center Product of Exponential-type Basis Functions
H. H. H. Homeier and E. O. Steinborn 399

Theoretical Prediction of Ionization Potential, Electron Affinity, and Electronic Spectrum of the S_2N Radical
A. B. Sannigrahi and S. D. Peyerimhoff 413

Quasi-Relativistic MS-Xα Approach to the Electronic Structures of Protactinium Halide Ions of $[PaX_8]^{4-}$ Type
S. Nour, C. Mehadji, H. Chermette, and J.-C. Krupa 421

An Optimized Orbital Transformation Able to Reproduce Partially Prefixed Overlaps
E. Gianinetti and I. Vandoni..... 437

An Open-Shell Coupled-Cluster Response Method for Static Properties
S. Pal..... 443

Modification of the Superposition of Correlated Configurations Method
M. Firszt and W. Woźnicki..... 453

A Quantum Chemical Study of Interchain Hopping Model of Negatively Charged Solitons in Polyacetylene
A. Tachibana, S. Ishikawa, Y. Asai, H. Katagiri, and T. Yamabe 461

Molecular Dynamic Structure and Dimerization of Polyacetylene
T. Lü, A. Tachibana, and T. Yamabe..... 475

Accurate Local Spin-Polarized Exchange Potential: Reconciliation of Generalized Slater and Kohn–Sham Methods
J. B. Krieger, Y. Li, and G. J. Iafrate..... 489

Computational Studies of the 3-Dimensional Structure of Cyclopenta Polycyclic Aromatic Hydrocarbons Containing a Gulf Region
R. E. Venegas, P. H. Reggio, and J. R. Rabinowitz 497

Density of States Due to Donor-Pair Molecules in Three- and Two-Dimensional Semiconductor Systems
E. A. Guimarães Costa, F. De Brito Mota, and A. Ferreira Da Silva .. 517

Book Review

Energy Density Functional Theory of Many-Electron Systems. By E. S. Kryachko and E. V. Ludeña
Reviewed by J.-L. Calais 525

(continued)

Issue No. 4, February 20, 1992

On the Redistribution of Electrons for Chemical Reaction Systems
A. Tachibana and R.G. Parr 527

A Global Characterization and Similarity Analysis of Two-Dimensional Potential Energy Surfaces
X. Luo and P.G. Mezey 557

Localization of Electron Group Functions
B. P. Zapol and V. E. Puchin 581

Ab Initio Studies of Parts of the Potential Surface for the System $C_3H_6 + HO_2$
P. N. Skancke 591

Theoretical Study of CO Adsorption on the Ni—Cu(110) System
N. J. Castellani 599

Integral Representation of a Fundamental Functional for the Study of the Zero-Point Vibrational Energy of Hydrocarbons and the Total Pi-Electron Energy of Alternant Hydrocarbons
S. Arimoto and G.G. Hall 613

On the Relation Between Core Electron Binding Energies of Ions in Solution and Their Solvation Energies
M. Arbman, R. Moberg, S. Holmberg, U. I. Wahlgren, and H.O.G. Siegbahn 637

Issue No. 5, March 5, 1992

Normalized Irreducible Tensorial Matrices and the Wigner–Eckart Theorem for Unitary Groups: A Superposition Hamiltonian Constructed from Octahedral NITM
M. L. Ellzey, Jr. 653

Linear Dependence of Total π-Electron Energy of Benzenoid Hydrocarbons on Kekulé Structure Count
I. Gutman and G.G. Hall 667

Hyperspherical Sturmian Basis Functions
J. Avery and D. R. Herschbach 673

Valence and Hypervalence in Compounds with Second-Row Elements
K. Jug and E. Fasold 687

The Application of Cyclic Spin Permutations to the Theory of Strongly Correlated Electron Systems
V.O. Cheranovskii 695

Conformational Preferences of 6-Furfuryl Amino Purine and 6-Benzyl Amino Purine
R. Tewari 709

A New Expansion for r_{12}^{-2}
A. Lüchow and H. Kleindienst 719

The Second-Order Energy Contribution from the Spin–Orbit Interaction Operator to the Potential Energy Curve of Cr_2
O. Vahtras, H. Ågren, P. Jørgensen, H. Jørgen Aa. Jensen, and T. Helgaker 729

Ab Initio Studies of the Electronic Structure and Density of States of Metallic Beryllium
R. B. Ross, W.C. Ermler, C.W. Kern, and R. M. Pitzer 733

Löwdin α-Function, Overlap Integral, and Computer Algebra
H.W. Jones 749

Book Reviews

Computational Chemical Graph Theory. Edited by D. H. Rouvray
Reviewed by E. K. Lloyd 755

Computational Advances in Organic Chemistry: Molecular Structure and Reactivity. Edited by C. Ögretir and I. G. Csizmadia
Reviewed by L. Eriksson 759

Issue No. 6, March 20, 1992

On the Prüfer Transformation in the H_2^+ Problem
I. Úlehla 763

(continued)

Molecular Equilibrium Geometries and Vibrational Frequencies by Maximum Overlap Symmetry Molecular Orbital Method
C.-G. Zhan 773

A Pair-Excitation MCSCF Calculation Based on CNDO/INDO Approximation I
S. Kumakura, S. Shiraishi, M. Izawa, and M. Hanamura 785

Self-Consistent-Field Potential-Energy Surfaces for Hydrogen Atom Pairs within Small Palladium Clusters
J. Anchell, M. Gutowski, J. Nichols, and J. Simons 793

Algebraic Approximation to the Franck–Condon Factors for the Morse Oscillator
A. Palma, J. F. Rivas-Silva, J. S. Durand, and L. Sandoval 811

Ab Initio Calculations on 5α-Androstane
Lj. Paša-Tolić, L. Klasinc, H. Spiegl, J.V. Knop, and S. P. McGlynn ... 815

A Laplace Transform Solution of Schrödinger's Equation Using Symbolic Algebra
M. E. Clarkson and H.O. Pritchard 829

Quantum Fluid Density Functional Theory of Helium Atom in an Intense Laser Field
P. K. Chattaraj 845

Contents for Volume 42, 1992, Nos. 1–6

Issue No. 1, April 5, 1992

H–F for Extended Systems

Editorial
P.-O. Löwdin 1

Introduction
J.-L. Calais 3

Near-Hartree–Fock Wave Functions for Solids: The Case of Crystalline Silicon
C. Pisani, R. Dovesi, and R. Orlando 5

Exact and Approximate Hartree–Fock Calculations for Extended Metallic Systems
J.-L. Calais and J. Delhalle 35

Electronic-Phase Transition Associated with Instability of the Hartree–Fock Solution of Infinite One-Dimensional System
K. Tanaka, H. Kobayashi, M. Okada, M. Kobashi, and T. Yamabe ... 45

Broken Symmetry Solutions of the Extended Hubbard Model
M.-A. Ozaki ... 55

Iteration of the Schrödinger Equation Starting from Hartree–Fock Wave Functions
J. Avery and F. Antonsen ... 87

Correlation Energy Calculations for Infinite Systems
P. Fulde and G. Stollhoff ... 103

Electron Correlation in One Dimension: Coupled Cluster Approaches to Cyclic Polyene π-Electron Models
J. Paldus and P. Piecuch ... 135

Behavior of Coupled Cluster Energy in the Strongly Correlated Limit of the Cyclic Polyene Model. Comparison with the Exact Results
P. Piecuch, J. Čížek, and J. Paldus ... 165

Structural and Electronic Properties of Infinite *cis* and *trans* Polyenes: Perturbation Theory of Electron Correlation Effects
S. Suhai ... 193

Strategies for Electron Correlation Calculations on Large Molecular Systems
S. Saebø ... 217

Announcement ... 241

Issue No. 2, April 20, 1992

On Geometric Concepts in Sensitivity Analysis of Molecular Charge Distribution
R. F. Nalewajski ... 243

C—H Bond Dissociation of Acetylene: Local Density Functional Calculations
D. Habibollahzadeh, J. S. Murray, M. Grodzicki, J. M. Seminario, and P. Politzer ... 267

(continued)

Calculations on Model Systems Using Quasi-Degenerate Variational Perturbation Theory with an Average Pair Correction
C. Murray, S.C. Racine, and E.R. Davidson 273

Bethe Logarithm and Lamb Shift for the Hydrogen Molecular Ion
R. Bukowski, B. Jeziorski, R. Moszyński, and W. Kołos 287

On the Quantum Properties of Adsorbed Particles within the Model of a Hydrogen Atom Near a Hard Wall
A.F. Kovalenko, E.N. Sovyak, and M.F. Holovko 321

The Properties of *n*-Electron Wave Functions Built Up with Two Kinds of Geminals
C. Liu, C. Deng, H. Hu, and B. Jin 339

Electronic States and Nature of the Chemical Bond in the Molecule CrC by All-Electron Ab Initio Calculations
I. Shim and K.A. Gingerich 349

Issue No. 3, May 5, 1992

Calculation of Time Autocorrelation and Spectral Functions Using Locally Expanded Potentials
A. Cesar and H. Ågren 365

Theoretical Study on the Reaction Mechanism of the Alcoholysis of Isocyanates
M.-S. Tang and X.-Y. Fu 403

Application of an Optimization Technique to the Discretized Version of the Griffin–Hill–Wheeler–Hartree–Fock Equations
R. Custodio, M. Giordan, N.H. Morgon, and J.D. Goddard 411

Vibronic Dressed Electronic States and Nonadiabatic Effects in Polyacetylene
T.-X. Lü, A. Tachibana, and T. Yamabe 425

The Evaluation of the Hybrid One-Center Integrals Used in the Semiempirical NDDO-Type Methods for *d*-Elements from Spectra
I.L. Zilberberg, M.J. Filatov, and G.M. Zhidomirov 439

Implications of Unitary Invariance for Gradient Theory
D. Jayatilaka and N.C. Handy 445

Shape Similarity and Shape Stability Along Reaction Paths: The Case of the PPO → OPP Isomerization
X. Luo, G.A. Arteca, and P.G. Mezey 459

Vibrational Self-Consistent-Field Approximation for Triatomic Molecules Using Hyperspherical Modes with Application to H_2O
A. Bastida, J. Zúñiga, A.M. Molina, and A. Requena 475

Investigation on the Intermolecular Electrostatic Interactions of Some Polar Molecules with Cumulative Potential-Derived Atomic Multipole Method
J. Kong and J.-M. Yan 489

Electron Correlation in Pericyclic Reactivity: A Similarity Approach
R. Ponec and M. Strnad 501

Extended Gaussian-Type Valence Basis Sets for Calculations Involving Nonempirical Core Pseudopotentials. II. PS-21 G Basis for Li to Ca and Ga to Kr Atoms
Y. Hannachi, J.C. Barthelat, L.-H. Jolly, B. Silvi, and Y. Bouteiller 509

Issue No. 4, May 20, 1992

Issue in honor of Enrico Clementi. I

Enrico Clementi 523

Introduction 525

Curriculum Vitae 527

Publications List of Enrico Clementi 529

Chemistry and Computers: On Research Aims from My Preparatory Period Until Early 1991
E. Clementi 547

(continued)

GENERAL THEORY

An Essay on the Theory and Calculations of Intermolecular Interactions
P. Hobza and R. Zahradník 581

Retrospective Outlook on Computational Aspects of Energy Density Functional Theory: Explicit and Implicit Contributions of Enrico Clementi
E. S. Kryachko and T. Koga 591

A Dirac–Fock Self-Consistent Field Method for Closed-Shell Molecules Including Breit Interaction
A. K. Mohanty 627

On the Complex Relations Between Equations Describing the Dynamics of Wave and Particle Aspects
D. Schuch 663

The Core Electron Shake Phenomenon
H. Ågren and V. Carravetta 685

INFORMATICS

On Boolean Algebra and Its Importance for the Computer Sciences
P.-O. Löwdin 719

A Project for an Intelligent System: Vision and Learning
T. Poggio and L. Stringa 727

Advances in Automatic Speech Recognition by Combining Information Theory and Neural Network Algorithms
G. Rigoll 741

MOLECULAR INTEGRALS AND NUMERICAL WORK

Molecular Integrals of Breit Interactions over Laguerre Gaussian-Type Functions
N. Fujimura and O. Matsuoka 751

On the Evaluation of Overlap Integrals with Exponential-Type Basis Functions
H. H. H. Homeier and E. O. Steinborn 761

Semianalytical Method for Four-Center Molecular Integrals over Slater-Type Orbitals
H.W. Jones 779

A Three-Dimensional Finite Element Approach Towards Molecular SCF Computations
H. Murakami, V. Sonnad, and E. Clementi 785

A Method of Calculating Eigenvectors of Real Symmetric Tridiagonal Matrices in a Hyperspherical Space
B. K. Novosadov and V.V. Zhogina 819

On the Calculation of Rys Polynomials and Quadratures
R. P. Sagar and V. H. Smith, Jr. 827

APPLICATION TO ATOMS

Monte Carlo Determination of the Oscillator Strength and Excited State Lifetime for the Li $2^2S \rightarrow 2^2P$ Transition
R. N. Barnett, P. J. Reynolds, and W. A. Lester, Jr. 837

Spline Methods for Multiconfiguration Hartree–Fock Calculations
C. Froese Fischer, W. Guo, and Z. Shen 849

APPLICATION TO MOLECULES

Mills–Nixon Effect in Heteroanalogs of Cyclopropabenzene
M. Eckert-Maksić, Z. B. Maksić, M. Hodošček, and K. Poljanec 869

Photochromic Spironaphthoxazines: A Theoretical Study
V. Malatesta, G. Ranghino, U. Romano, and P. Allegrini 879

A Heuristic Potential Function for Intramolecular and Intrasupermolecular Chemical Reactions
M. Nagaoka, Y. Okuno, T. Yamabe, and K. Fukui 889

Nonadiabatic Theory of Triatomics: Formalism for $^1\Pi_u/^1\Phi_g$ Interaction, for Electronic Spin, and for $^2\Lambda$ Renner–Teller Effect
C. Petrongolo 907

Ab Initio Calculations of the Ground-State Potential Energy Surface for the C—F Bond Decomposition in *n*-Fluoropropane within the Method for Approximation of the Frozen Molecular Fragment
S. Roszak and J. J. Kaufman 917

(continued)

Dynamic Stability of Silacarbonyl Ylide
A. Tachibana, H. Fueno, I. Okazaki, and T. Yamabe 929

Discretization to Avoid Singularities in Vibration–Rotation Hamiltonians: A Bisector Embedding for AB_2 Triatomics
J. Tennyson and B.T. Sutcliffe 941

The Structure of the Bitetrahedryl Molecule—A Major Shift Due to Electron Correlation: Effects of Carbonyl Substituents, Implications for the Structure of Coupled Tricyclo[3.1.0.$0^{2,6}$] Hexyl, and Extension to Cubylcubane
Y. Xie, H. F. Schaeffer, III, P. Aped, K. Chen, and N. L. Allinger 953

TRANSITION METAL COMPOUNDS

Structure of $Mn_2(CO)_{10}$ and $Mn_2(CO)_9$: Insights from Ab Initio Calculations
A. Veillard and M.-M. Rohmer 965

Relativistic Corrections in the LCGTO–Local-Spin-Density Method. I. Atomic Bases for Transition Metals
A. Wilkin and D. R. Salahub 977

EXTENDED SYSTEMS INCLUDING POLYMERS

Electronic Structure of Poly(pyrrole–thiophene) Copolymers: Design of Polymeric Quasi-One-Dimensional Superlattices
A. K. Bakhshi and J. Ladik 997

Determination of Ab Initio Polarizabilities of Polymers: Application to Polyethylene and Polysilane
B. Champagne and J.-M. André 1009

Development of the Quadratic Korringa–Kohn–Rostoker Band Theory Method
J. S. Faulkner 1025

Near-Equilibrium Ordering of the Crystalline Phases of Atomic Hydrogen
J. A. Nobel, G. A. Wilson, and S. B. Trickey 1037

Ab Initio Studies on the Ziegler–Natta Catalytic Process
O. Novaro 1047

A Fragment Multipole Approach to Long-Range Coulomb Interactions in Hartree–Fock Calculations on Large Systems
I. Panas and J. Almlöf 1073

Issue No. 5, June 5, 1992

Issue in honor of Enrico Clementi. II

SURFACES

Ab Initio Study of K Adsorption on a Ag(100) Surface
S. Gayen and W.C. Ermler 1091

Theoretical Study of the Hydrogen Chemisorption on a ZnO Surface
H. Nakatsuji and Y. Fukunishi 1101

Molecular Orbital Cluster Model Study of Bonding and Vibrations of CO Adsorbed on MgO Surface
G. Pacchioni, G. Cogliandro, and P. S. Bagus..... 1115

On the Interaction of Ions with a Platinum Metal Surface
J. Seitz-Beywl, M. Poxleitner, M. M. Probst, and K. Heinzinger..... 1141

A Theoretical Study of Atomic Oxygen Chemisorption on the Ni(100) and Ni(111) Surfaces
P. E. M. Siegbahn and U. Wahlgren 1149

CLUSTERS AND LIQUIDS

A Molecular Dynamics Study of Large-Scale Reversible Aggregation of Anisotropic Particles
F. Brugè, V. Martorana, S. L. Fornili, and M. B. Palma-Vittorelli..... 1171

Comments on the Carbon Cluster C_{60} and on Its Complexes with Alkaline Elements
G. Corongiu and E. Clementi 1185

Molecular Dynamics Simulation for Liquid Water Using a Polarizable and Flexible Potential
G. Corongiu 1209

Electrostatic Water Models
G.G. Hall and C. M. Smith 1237

(continued)

From Molecule to Cluster to Bulk: Water OH Vibrations in Different Surroundings
K. Hermansson and L. Ojamäe 1251

On the Possible Roles of the Zn Cation in the Carbon Dioxide Hydration Reaction: An Ab Initio RHF-SCF MO Study of Transition Structures on the $[OH_2 + CO_2]$ $[ZnOH_2CO_2]^{2+}$ and $[ZN(NH_3)_3OH_2CO_2]^{2+}$ Reactive Hypersurfaces
O. Jacob and O. Tapia 1271

What Does Zeolitic Water Look Like?: Modelization by Molecular Dynamics Simulations
L. Leherte, J.-M. Andre, E.G. Derouane, and D.P. Vercauteren 1291

Ab Initio SCF Molecular Dynamics: Exploring the Potential Energy Surface of Small Silicon Clusters
S.A. Maluendes and M. Dupuis 1327

Monte Carlo Simulation of Liquid Hydroxylamine Using Ab Initio Intermolecular Potential Functions
Y. Michopoulos and B.M. Rode 1339

BIOLOGICAL APPLICATIONS

Ab Initio Force Field for Simulations of Proteins and Nucleic Acids
M. Aida, G. Corongiu, and E. Clementi 1353

The Electron–Nucleus Coupling: A Breakthrough in the Investigation of Paramagnetic Metalloproteins
L. Banci, I. Bertini, F. Capozzi, and C. Luchinat 1383

Stochastic Dynamic Simulation of a Protein
D.K. Bhattacharya, E. Clementi, and W. Xue 1397

Theoretical Prediction of Sequence-Dependent DNA Superstructures and Their Implications in Recognition Mechanisms with Proteins
D. Boffelli, P. De Santis, A. Palleschi, A. Scipioni, and M. Savino 1409

Enthalpic and Entropic Contributions of Water Molecules to the Functional T → R Transition of Human Hemoglobin in Solution
D. Bulone, M.B. Palma-Vittorelli, and M.U. Palma 1427

Molecular Mechanics Study of the β-Spiral Conformations of the Phe^4, Tyr^4, and Trp^4 Analogs of Elastomeric Poly(Val^1-Pro^2-Gly^3-Val^4-Gly^5)
C.-H. Luan and D.W. Urry 1439

Polarizable Continuum Model of Solvation for Biopolymers
V. Frecer and S. Miertuš 1449

Cobalt Spectroscopy and the Structure of the Active Site of Carbonic Anhydrase
D. R. Garmer and M. Krauss 1469

Fluorescence Lifetime Distribution of Folded and Unfolded Proteins
E. Gratton, N. Silva, G. Mei, N. Rosato, I. Savini, and A. Finazzi-Agro 1479

Inter- and Intramolecular Motions in Proteins
F. Barak 1491

Computational Investigation of the Role of Hydration in Nucleic Acid Structure and Function
V. I. Poltev, A. V. Teplukhin, and G. G. Malenkov 1499

A General Algorithm for Computing Voronoi Volumes: Application to the Hydrated Crystal of Myoglobin
P. Procacci and R. Scateni 1515

Some Approaches to the Multiple-Minima Problem in the Calculation of Polypeptide and Protein Structures
H. A. Scheraga 1529

Computational Studies on Aspartic Proteases. I. Active-Site Protonation and Hydration in the Substrate-Free Crystalline State
L. Turi and G. Náray-Szabó 1537

Studies of Protein Hydration in Aqueous Solution by High-Resolution Nuclear Magnetic Resonance Spectroscopy
K. Wüthrich and G. Otting 1553

Ab Initio CI Calculations on Free-Base Porphin
Y. Yamamoto, T. Noro, and K. Ohno 1563

NON-LINEAR PROPERTIES

Ab Initio CPHF Calculations of the Static Polarizability and Second Hyperpolarizability of Small Molecules: Comparisons Between Standard and Moderately Large Basis Sets Augmented with Diffuse Functions
M. Dory, L. Beudels, J. G. Fripiat, J. Delhalle, J. M. André, and M. Dupuis 1577

(continued)

Electronic Structure and Nonlinear Optical Properties of Push–Pull Conjugated Molecules
F. Meyers and J. L. Brédas 1595

MOLECULAR ELECTRONICS

A Strategic Plan for Molecular Electronics
A. Aviram 1615

Toward Designing Molecular-Electronics Devices: A Potential Significance of Highly Mobile Equilibrium Interconversions
Z. Slanina 1625

Issue No. 6, June 20, 1992

A Quantum Chemical Study of the Interaction of Carbenes with 2-Alkenylfurans and Thiophenes
L. V. Ermolaeva, S. G. Vul'fson, V. M. Shostakovsky, and O. M. Nefedov 1633

Effects of Exchange on Equilibrium Bond Lengths of Heavy, Almost Spherical, Tetrahedral Molecules XH_4
S. A. Egorov, N. H. March, and R. Santamaria 1641

The Electronic Transition Energies of Four Alternative C_{60} Molecules
I. László and L. Udvardi 1651

A Theoretical Study of the Ground-State Potential Surface of Guanine and Its Binding with Oxygen and Water
C. Santhosh and P. C. Mishra 1659

Conformational Structure of the Tetrapeptide Boc–Aib–Leu–Leu–Aib–OMe—the Central Fragment of the Nonapeptide Antibiotic Leucinostatin A
F. S. Nandel, B. Singh, and A. Saran 1669

Molecular Quantum Similarity Measures and *N*-Dimensional Representation of Quantum Objects. I. Theoretical Foundations
R. Carbó and B. Calabuig 1681

Molecular Quantum Similarity Measures and *N*-Dimensional Representation of Quantum Objects. II. Practical Applications
R. Carbó and B. Calabuig 1695

Matrix Elements of the $U(2n)$ Generators in the Spin-Orbit Basis
A. V. Titov 1711

A Theoretical Study of Electronic Spectra of Radical Cations of Some Dihydroxynaphthalenes
Z. H. Khan 1717

Quasispin Symmetry for the Derivation of Coupled Cluster Equations for the Hubbard Model of Benzene
F. Vinette 1737

Effect of Conjugated Length on the Calculated Nonlinear Second-Order Optical Susceptibilities of Some Organic Molecules
X. L. Gao, J. K. Feng, and C. C. Sun 1747

Thomas–Fermi–Dirac Models of Atoms Constrained by Nuclear Cusp and Long-Range Conditions
Z. Zhou and R. G. Parr 1759
